## GTE Automatic Electric Alumni Web Site

(Para el blog [historiatelefonia.com](http://historiatelefonia.com) noviembre 2108)

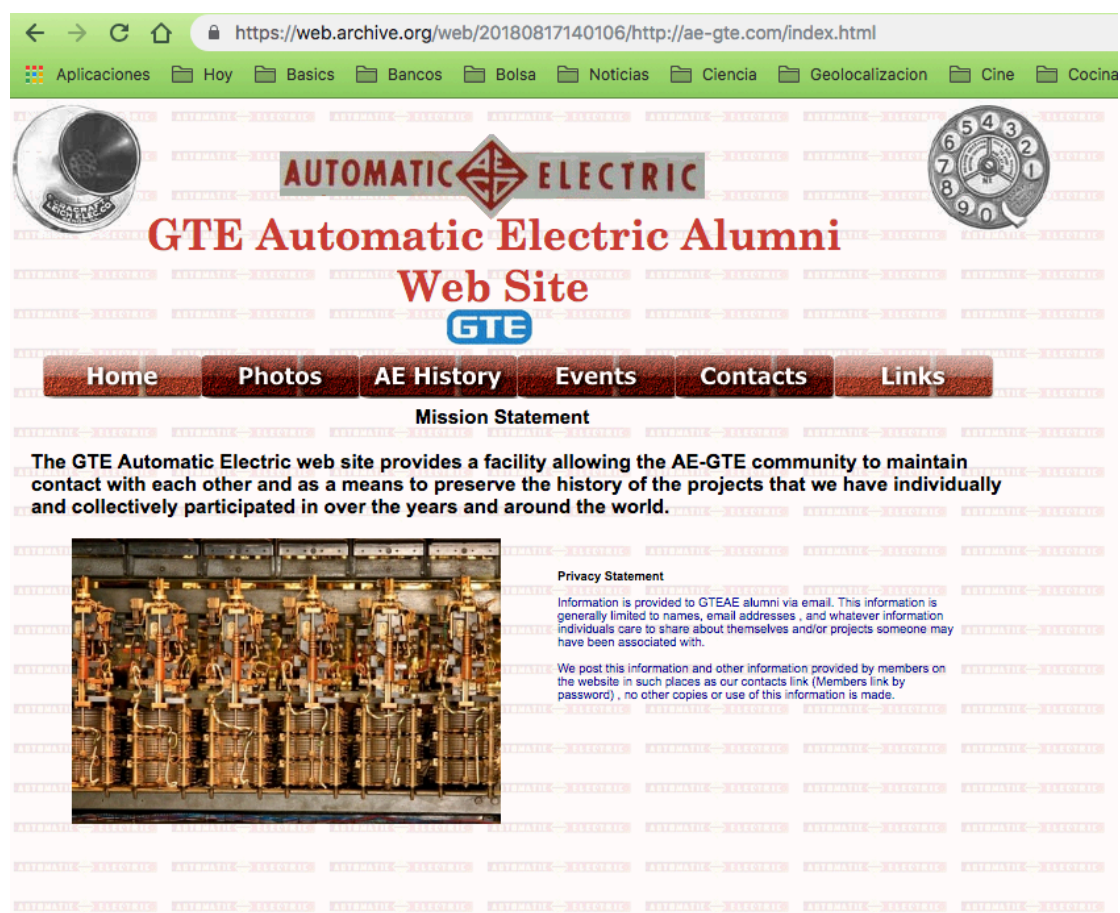

En esta sencilla página web encontramos información de interés sobre la historia de las personas y empresas que contribuyeron a la invención de los primeros sistemas de conmutación automáticos paso a paso tipo Strowger.

Lamentablemente en noviembre de 2018 dejó de ser accesible en la URL habitual. Gracias a [archive.org](http://archive.org) hemos recuperado y capturado las páginas más relevantes a modo de pequeño homenaje a sus autores.

<https://web.archive.org/web/20180817140106/http://ae-gte.com/index.html>

En este pequeño documento las copiamos para su recuerdo.

### PORTADA

The screenshot shows a web browser window with the URL <https://web.archive.org/web/20180817140106/http://ae-gte.com/index.html>. The browser's address bar and navigation buttons are visible at the top. Below the browser, the website's header features a navigation menu with links for Home, Photos, AE History, Events, Contacts, and Links. The main content area includes a "Mission Statement" section with the text: "The GTE Automatic Electric web site provides a facility allowing the AE-GTE community to maintain contact with each other and as a means to preserve the history of the projects that we have individually and collectively participated in over the years and around the world." Below this is a photograph of a large, complex mechanical switchboard. To the right of the photo is a "Privacy Statement" section with the text: "Information is provided to GTEAE alumni via email. This information is generally limited to names, email addresses, and whatever information individuals care to share about themselves and/or projects someone may have been associated with. We post this information and other information provided by members on the website in such places as our contacts link (Members link by password), no other copies or use of this information is made."

HISTORIA DE AE  
Los dos pdf están disponibles.
